PROFESSIONAL SUMMARY

Full-Stack Developer and Software Engineer with 2+ years of professional experience at Bosch and a proven track record of independently building and shipping production-deployed web applications. Skilled in React.js, Next.js, Node.js, TypeScript, REST APIs, and DevOps practices including Docker and CI/CD. Solo builder of live, revenue-generating products — including an e-commerce platform processing real orders and an online competition platform serving [2,500+] users. Brings production engineering discipline from automotive software (code reviews, version control, release management, cross-team coordination) with a founder mindset for clean code, automation, and scalable systems.

PERSONAL PROJECTS & LIVE PRODUCTS

SM Gadgets – Full-Stack E-Commerce Platform

smgadget.in

Tech Stack: React.js, Node.js, Next.js, MongoDB, REST APIs, Payment Gateway, Shiprocket API

- Solo-designed, developed, and deployed a production-grade e-commerce web application from scratch with complete frontend, backend, and database architecture — handling **[100+ monthly orders]** with **[3]s average page load time**.
- Implemented secure user authentication (JWT/session-based), product catalog management with **[20+] product listings**, shopping cart, and end-to-end checkout flow.
- Integrated **payment gateway** for secure transactions and **Shiprocket logistics API** for automated shipping, label generation, and real-time order tracking.
- Built responsive UI/UX with role-based access for customers and admin dashboard for order/inventory management.

Kalakriti Events – Online Competition Platform

kalakritievents.co.in

Tech Stack: React.js, Node.js, REST APIs, MongoDB, Cloud Hosting

- Built and launched Kalakriti Events, an online competition platform serving **[2,500+] registered users** across **6 events** with **99+% uptime**.
- Engineered backend architecture to handle high concurrent traffic, user registrations, submissions, judging workflows, and event lifecycle management.
- Deployed on cloud infrastructure with CI/CD pipeline, uptime monitoring, and optimized performance on a lean hosting budget.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, Authentication (JWT), Session Management
- **Databases:** MongoDB, SQL, Mongoose
- **DevOps & Cloud:** Docker, CI/CD Pipelines, Git, GitHub Actions, AWS (EC2, S3 basics), Linux, Nginx, Cloud Hosting
- **Programming Languages:** JavaScript, TypeScript, Python, C, C++ (OOP), SQL
- **Tools & Platforms:** GitHub, VS Code, Postman, JIRA, SVN, npm/yarn
- **Concepts:** Data Structures & Algorithms, OOP, Software Testing, Agile/Scrum, REST API Design, System Design Fundamentals
- **Integrations:** Payment Gateways, Shiprocket Logistics API, Third-Party REST APIs

PROFESSIONAL EXPERIENCE

Bosch Global Software Technologies (BGSW)

Pune, India

Software Engineer – Lead Integrator

January 2024 – Present

- Shipping production software at a global Tier-1 automotive company — writing, reviewing, and integrating code across 3 ECU programs (GPEC5+, GMET6, T6HD) with rigorous version control (SVN, Git) and Agile delivery practices.

- Independently owned mainline software integration for the **T6HD Heavy Duty** program, direct handling of customer deliveries without supervisory support including direct customer interactions for clarifications and release coordination.
- Currently leading integration as **Lead Integrator** for the **T6HD** program, managing **2 active variants (ICE and REPB)** and coordinating across **[5+] cross-functional teams**.
- Architected and shipped “**SW Delivery Kit**”, a Python automation tool that cut release packaging time by **~70%** (from ~2 hrs to ~30 min), adopted by **[6+] team members** — demonstrating a builder mindset applied to enterprise workflows.
- Built strong fundamentals in software testing (SIL/HIL, Functional Testing, Regression), CI/CD pipeline workflows, code review practices, and cross-functional collaboration in a large-scale engineering organization.

ACHIEVEMENTS & RECOGNITIONS

- “**Kudos**” – **Bosch (Dec 2025)**: Recognized for dedication and consistent quality in technical activities.
- “**Round of Applause**” – **Bosch (Apr 2025)**: Recognized by leadership for quickly adapting to the team and taking significant responsibility early in tenure.
- “**Managed Complexity – Shout Out**” – **Bosch (Apr 2025)**: Appreciated for commitment, attention to detail, and enabling seamless mainline integration.
- “**The Learner**” – **Bosch (Dec 2024)**: Appreciated for rapidly learning new technologies and onboarding effectively.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Telecommunication Engineering CGPA: [7.86/10]
Savitribai Phule Pune University (SPPU), Pune June 2023
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Database Management, Operating Systems

CERTIFICATIONS

- Data Structures and OOP with C++ – CS104, CS105 Masterclass
- Python Programming Complete Course
